

**E-TABLE 51-2** SCREENING LABORATORY RESULTS FOR COAGULATION FACTOR DEFICIENCIES

DEFICIENT FACTOR	FREQUENCY	PT	PTT	TT
I (fibrinogen)	Rare	↑	↑	↑
II (prothrombin)	Rare	↑	↑	↑
V	1 : 1,000,000	↑	↑	NL
VII	1 : 500,000	↑	NL	NL
VIII	1 : 5000 (male patients)	NL	↑	NL
IX	1 : 30,000 (male patients)	NL	↑	NL
X	1 : 500,000	↑	↑	NL
XI	Rare*	NL	↑	NL
XII <sup>†</sup> or HMWK <sup>‡</sup> or PI <sup>†</sup>	Rare	NL	↑	NL
XIII	Rare	NL	NL	NL

HMWK, High-molecular-weight kininogen; NL, normal; PK, prekallikrein; PT, prothrombin time; PTT, partial thromboplastin time; TT, thrombin time; ↑, increased over normal range.

\*Except in those of Ashkenazi Jewish descent (about 4% of whom are heterozygous for factor XI deficiency).

<sup>†</sup>Not associated with clinical bleeding.

<sup>‡</sup>Not associated with clinical bleeding.
