| 74 | 280 | 287 | 295 | 303 | 311 | 319 | 326 | 334 | 342 | 350 | 358 | 365 | 373 | 381 | 389 | 396 | 404 | 412 | 420 |
| 75 | 287 | 295 | 303 | 311 | 319 | 327 | 335 | 343 | 351 | 359 | 367 | 375 | 383 | 391 | 399 | 407 | 415 | 423 | 431 |
| 76 | 295 | 304 | 312 | 320 | 328 | 336 | 344 | 353 | 361 | 369 | 377 | 385 | 394 | 402 | 410 | 418 | 426 | 435 | 443 |

patient motivation and support, stressful life events, psychiatric status, time availability and constraints, and appropriateness of goals and expectations. Readiness can be viewed as the balance of two opposing forces: (1) motivation, or the patient's desire to change; and (2) resistance, or the patient's resistance to change.

TABLE 416-2 CLASSIFICATION OF WEIGHT STATUS AND DISEASE RISK

| Classification | Body Mass Index (kg/m ²) | Obesity Class | Disease Risk |
|-----------------|--------------------------------------|---------------|----------------|
| Underweight | <18.5 | — | — |
| Healthy weight | 18.5–24.9 | — | — |
| Overweight | 25.0–29.9 | — | Increased |
| Obesity | 30.0–34.9 | I | High |
| Obesity | 35.0–39.9 | II | Very high |
| Extreme obesity | ≥40 | III | Extremely high |

Source: Adapted from the National Institutes of Health, National Heart, Lung, and Blood Institute: *Clinical Guidelines on the Identification, Evaluation, and Treatment of Overweight and Obesity in Adults*. U.S. Department of Health and Human Services, U.S. Public Health Service, 1998.

A helpful method to begin a readiness assessment is to use the motivational interviewing technique of “anchoring” the patient's interest and confidence to change on a numerical scale. With this technique, the patient is asked to rate—on a scale from 0 to 10, with 0 being not so important (or confident) and 10 being very important (or confident)—his or her level of interest in and confidence about losing weight at this time. This exercise helps establish readiness to change and also serves as a basis for further dialogue.

TREATMENT OBESITY

THE GOAL OF THERAPY

The primary goals of treatment are to improve obesity-related comorbid conditions and to reduce the risk of developing future comorbidities. Information obtained from the history, physical examination, and diagnostic tests is used to determine risk and develop a treatment plan (Fig. 416-1). The decision of how aggressively to treat the patient and which modalities to use is determined by the patient's risk status, expectations, and available resources.
