PROP1 gene mutations
in adrenal insufficiency, 2256, 2325t
in hypogonadotropic hypogonadism, 2364, 2364t
Propafenone
action of, 273e-6t
adverse effects of, 1480t, 1489
for arrhythmias, 1480t
for atrial fibrillation, 1489
dosage of, 1480t
for focal atrial tachycardia, 1479
genetic variations in response to, 39t, 40
metabolism of, 34t
pharmacology of, 1480t
for ventricular arrhythmias, 1498
Propantheline bromide, 2672
Prophages, 86e-4
Propionibacterium acnes, 1095
in acne vulgaris, 351. *See also* Acne vulgaris
in osteomyelitis, 839, 841t
Propionic acidemia, 434e-3t
Proplatelets, 275, 741
Propofol
adverse effects of, 85e-9
for delirium, 64t, 65
in mechanical ventilation, 1741
overdosage/poisoning with, 473e-10t
Proportional assist ventilation, 1743
Propoxyphene, 473e-13t
Propranolol
for adrenergic symptoms in Graves' disease, 2296
adverse effects of, 2286t, 2594t, 2640t
for aortic dissection, 1641
for ataxia/tremor, 2619–2620
for cocaine toxicity, 469e-2
for hypertension, 1624t
for hypokalemic paralysis, 305, 307
for ischemic heart disease, 1589t
for long QT syndrome, 1497
for methylxanthine overdosage/poisoning, 473e-8t
for migraine prevention, 2594t
overdosage/poisoning with, 473e-9t
for pheochromocytoma, 2331
for phobic disorders, 2712
for postpartum thyroiditis, 2299
for sex headache prevention, 2597
for sympathomimetic overdosage/poisoning, 473e-8t
Proprioception, 158
Proptosis, 207, 386e-2f. *See also* Graves' ophthalmopathy
Propylene glycol poisoning, 64e-9, 319
Propylthiouracil
adverse effects of, 354, 382, 462e-20, 2218t, 2296
for Graves' disease, 2296
for hyperthyroidism in pregnancy, 48
for radioactive iodine exposure, 263e-7
for thyroid storm, 2297
Prosody, 179
Prosopagnosia, 182, 197
Prostacyclin
functions of, 265e-2, 265e-4, 745
in pulmonary hypertension, 1659
in shock, 1745
synthesis of, 1914f
Prostaglandin(s)
in dysmenorrhea, 338
in gastroduodenal mucosal defense and repair, 1912, 1913f
in male sexual response, 324
pain and, 87, 88f
in shock, 1745, 1746
synthesis of, 1912
Prostaglandin analogues
adverse effects of, 272, 1921
for glaucoma, 200, 205
for peptic ulcer disease, 1920t, 1921
Prostaglandin E_2
ectopic production of, 609t
in gastric epithelia defense and repair, 1913
in sunburn erythema, 386
synthesis of, 1914f
in thermoregulation, 126
Prostate
anatomy of, 579–580
benign proliferative disease of. *See* Benign prostatic hypertrophy (BPH)
Prostate cancer, **579**
autopsy-detected, 580
back pain in, 118
bone lesions in, 582, 586
carcinoma of unknown primary and, 120e-4
clinical states model of, 580, 581f
deaths from, 467t, 469f, 470t, 471t, 580
diagnosis of, 580–582
epidemiology of, 580
erectile dysfunction after treatment of, 326
genetic considerations in, 101e-2t, 101e-6t, 580
incidence of, 467t, 468, 468f, 471t, 580
lymphedema in, 1654
metastatic, 119e-4, 604, 604t
paraneoplastic syndromes in, 609t, 612, 612t, 619
pathology of, 581–582
prevention of, 96e-7, 478, 580
prostate-specific antigen in, 581, 583
recurrent, 103e-15–16
screening for, 28, 29, 482–483, 482t, 580–581
staging of, 582, 582f, 582t
testosterone therapy and, 2373
testosterone therapy in men with history of, 7e-5
treatment of
vs. active surveillance, 483, 584
adverse effects of, 7e-4–5, 583
hormone receptor–directed agents, 103e-15, 585–586, 585f
late consequences of, 623, 624t
in localized disease, 582–584
in metastatic disease, 586–587
nomograms for, 583
pain management, 587
prostatectomy, 583
radiation therapy, 583–584
rising PSA after, 584
tumor vaccines, 103e-20
tumor markers in, 473t
Prostatectomy, 583, 587
Prostate-specific antigen (PSA)
in carcinoma of unknown primary, 120e-1, 120e-2t, 120e-4
free, 581
in prostate cancer, 581, 583
for prostate cancer screening, 482–483, 482t, 581
reference values for, 2762t
testosterone therapy and, 2373
as tumor marker, 473t
Prostatitis. *See also* Urinary tract infections (UTIs)
back pain in, 118
C. glucuronolyticum, 981
clinical features of, 863–864
diagnosis of, 60e-1
dysuria in, 60e-1
enterococcal, 973
treatment of, 867
tumor markers in, 473t
Prosthetic heart valve
abscess in, 271e-10f
anticoagulants for stroke prevention with, 2566t, 2571
endocarditis in
etiology of, 816, 817t
late-onset, 819
staphylococcal, 959, 960
treatment of, 822t, 825
heart sounds/murmurs in, 1450
Prosthetic joint infections
classification of, 843
clinical features of, 837–838, 843
dental procedures and, 242
diagnosis of, 838, 843
epidemiology of, 843
gram-negative bacteria in, 183e-3
microbiology of, 843
pathogenesis of, 843
prevention of, 844
treatment of, 838, 843–844, 963
Protamine sulfate, 751, 1635
Protease activation receptor 1 (PAR1), 276, 742
Protease activation receptor 1 (PAR1) inhibitors, 749
Protease inhibitors. *See* Combination antiretroviral therapy (cART)
Proteasome, 372e-19
Proteasome inhibitors, 102e-6, 102e-9f, 103e-18t, 103e-19, 214e-5
Protein(s)
aggregation of, in neurologic disease, 444e-9–10
amyloid precursor. *See* Amyloid precursor protein (APP)
apoptosis, 372e-27t
catabolism of, 461
circulating, 462
deficiency of, 463t
digestion and absorption of, 1937
lipoprotein-associated, 2436–2437
muscular dystrophy–associated, 462e-6, 462e-8, 462e-8f, 462e-9f
prion, 453e-1, 453e-1f
requirement for, 95e-1
secretory, 372e-22
serum binding, 2285–2286
signaling, 372e-27t
in specialized nutritional support formulas, 98e-5
TAP, 372e-19
thyroid hormone binding, 2286
Proteinase 3, 372e-24t, 2180
Protein balance, 98e-5, 463
Protein C
as anticoagulant, 402, 402f
elevated, 407
recombinant activated, 1758
reference values for, 2756t
Protein C concentrate, 738
Protein C deficiency
DIC in, 737
high-altitude symptoms of, 476e-4
thrombosis risk in, 402, 744
warfarin-induced skin necrosis in, 368, 379, 756
Protein-energy malnutrition
cachexia, 459–460, 1504
kwashiorkor. *See* Kwashiorkor
marasmus. *See* Marasmus
Protein G, 400e-3, 400e-3f
Protein kinase A
in opioid tolerance and withdrawal, 468e-1, 468e-2f
in steroidogenesis, 2311
in vascular smooth-muscle function, 265e-4
Protein kinase C, 2424
Protein kinase G, 265e-4
Protein-losing enteropathy, **1945**
Protein S
as anticoagulant, 402, 402f
deficiency, 744, 756
elevated, 407
reference values for, 2756t
Protein synthesis inhibitors, 930–932, 931t, 932f
Protein tyrosine phosphatase, 102e-3
Proteinuria, **293**
in acute kidney injury, 1805
approach to the patient, 293–294, 293f
in diabetic nephropathy, 1844
in glomerular disease, 1834, 1834t, 1835–1836t
pathophysiology of, 293–294, 1834
in preeclampsia, 45
in sepsis/septic shock, 1755
Proteobacteria, in human biome, 86e-7, 86e-10
Proteoglycans, 2507
Proteolysis, 460
Proteolytic enzymes, 2090
Proteomics, 6, 426, 455
