

Cushing HW: The basophil adenomas of the pituitary body and their clinical manifestations (pituitary basophilism). *Bull Johns Hopkins Hosp* 50:137–95, 1932. [Harvey Cushing's original description of the eponymous syndrome]

Thyroid

- Bahn RS: Graves' ophthalmopathy. *N Engl J Med* 362:726–38, 2010. [An outstanding review on Graves ophthalmopathy that encompasses pathogenesis, clinical features and treatment]
- Franklyn JA, Boelaert K: Thyrotoxicosis. *Lancet* 379:1155–66, 2012. [A clinically oriented review on causes and main therapeutic avenues in hyperthyroidism]
- Graves RJ: A newly observed affection of the thyroid gland in females. *London Med Surg J* 7:516–17, 1835. [A classic publication describing the index case of the disease named after the author]
- Gull WW: On a cretinoid state supervening in adult life in women. *Trans Clin Soc Lond* 7:180–5, 1873. [The original description of myxedema, hence also known as "Gull's disease"]
- Hashimoto H: Zur Kenntnis der lymphomatösen Veränderung der Schilddrüse (Struma lymphomatosa). *Arch Klin*, 97, 1912. [Dr. Hashimoto, a Japanese physician, also trained in Pathology in Germany, which might explain why his paper describing the eponymously named condition in four patients was originally published in German]
- Iyer S, Bahn R: Immunopathogenesis of Graves' ophthalmopathy: the role of the TSH receptor. *Best Pract Res Clin Endocrinol Metab* 26:281–9, 2012. [A comprehensive review of the autoimmune deregulation targeted against the TSH receptor in Graves ophthalmopathy]
- LiVolsi VA: Papillary thyroid carcinoma: an update. *Mod Pathol* 24(Suppl 2):S1–9, 2011. [A primer on papillary thyroid carcinoma from one of the foremost thyroid pathologists in the world]
- Nikiforov YE, Nikiforova MN: Molecular genetics and diagnosis of thyroid cancer. *Nat Rev Endocrinol* 7:569–80, 2011. [An excellent review on the molecular abnormalities in thyroid cancer and how to translate these to clinical diagnostics]

Parathyroid

- Al-Azem H, Khan AA: Hypoparathyroidism. *Best Pract Res Clin Endocrinol Metab* 26:517–22, 2012. [A clinically oriented review on parathyroid hypofunction]
- Sharretts JM, Simonds WF: Clinical and molecular genetics of parathyroid neoplasms. *Best Pract Res Clin Endocrinol Metab* 24:491–502, 2010. [A review on underlying genetic abnormalities contributing to parathyroid neoplasia, and clinical manifestations thereof]

Pancreas—Diabetes

- Antonetti DA, Klein R, Gardner TW: Diabetic retinopathy. *N Engl J Med* 366:1227–39, 2012. [A comprehensive review on the most common underlying cause of blindness in the United States, with discussions on pathophysiology, symptoms, diagnosis, and treatment]
- Danaei G, Finucane MM, Lu Y, et al: National, regional, and global trends in fasting plasma glucose and diabetes prevalence since 1980: systematic analysis of health examination surveys and epidemiological studies with 370 country-years and 2.7 million participants. *Lancet* 378:31–40, 2011. [An epidemiological treatise on global trends in impaired glucose tolerance and diabetes]
- Ferrannini E, Cushman WC: Diabetes and hypertension: the bad companions. *Lancet* 380:601–10, 2012. [A well balanced review that begins with a discussion of the pathogenetic mechanisms underlying the significant associations between these two conditions, and the impact of hypertension as co-morbidity on the natural history of type 2 diabetes]
- Inzucchi SE: Clinical practice. Diagnosis of diabetes. *N Engl J Med* 367:542–50, 2012. [An informative paper that tabulates the diagnostic criteria for diabetes in the clinic]
- Jellinger PS: Focus on incretin-based therapies: targeting the core defects of type 2 diabetes. *Postgrad Med J* 123:53–65, 2011. [An insightful review on this new class of therapeutics that is increasingly being utilized as a mainstay in type 2 diabetes]
- McCarthy MI: Genomics, type 2 diabetes, and obesity. *N Engl J Med* 363:2339–50, 2010. [Informative review on genome-wide susceptibility loci that contribute to the risk of type 2 diabetes, as well as those linked to body mass index and obesity]
- Neale GA, Hooiveld GJ, Hijmans A, et al: Inflammation is a central player in the induction of obesity and insulin resistance. *Proc Natl*

Acad Sci U S A 108:15324–9, 2011. [An excellent review on the role of the inflammome in the pathogenesis of insulin resistance and type 2 diabetes, underscoring the rising importance of inflammation in this disease]

- Rodbard HW, Jellinger PS, Davidson JA, et al: Statement by an American Association of Clinical Endocrinologists/American College of Endocrinology consensus panel on type 2 diabetes mellitus: an algorithm for glycemic control. *Endocr Pract* 15:540–59, 2009. [An algorithm based consensus statement from two of the major academic groups on how to treat hyperglycemia in diabetes, using the available armamentarium of therapies]
- Samuel VT, Shulman GI: Mechanisms for insulin resistance: common threads and missing links. *Cell* 148:852–71, 2012. [A mechanism heavy, yet lucid review on the pathogenesis of insulin resistance, with outstanding self-explanatory color illustrations]
- Tabak AG, Herder C, Rathmann W, et al: Prediabetes: a high-risk state for diabetes development. *Lancet* 379:2279–90, 2012. [A timely review on impaired glucose tolerance, a.k.a. prediabetes, and its natural history in progression to eventual diabetes]
- Tahrani AA, Bailey CJ, Del Prato S, et al: Management of type 2 diabetes: new and future developments in treatment. *Lancet* 378:182–97, 2011. [A clinical review on current and emerging treatment modalities available for control of type 2 diabetes]
- Vaxillaire M, Bonnefond A, Froguel P: The lessons of early-onset monogenic diabetes for the understanding of diabetes pathogenesis. *Best Pract Res Clin Endocrinol Metab* 26:171–87, 2012. [A review on monogenic forms of diabetes, and how these rare variants might inform the pathogenesis and management of the significantly more common multigenic type 2 diabetes]

Pancreas—Neuroendocrine Tumors

- de Wilde RF, Edil BH, Hruban RH, et al: Well-differentiated pancreatic neuroendocrine tumors: from genetics to therapy. *Nat Rev Gastroenterol Hepatol* 9:199–208, 2012. [An up-to-date review on newly identified genomic aberrations in pancreatic neuroendocrine tumors and how these can form the basis for personalized therapy]

Adrenal Cortex

- Addison T: *On the constitutional and local effects of disease of the suprarenal capsules*. London, 1855, Samuel Highley. [The original description of Addison disease]
- Almeida MQ, Stratakis CA: Carney complex and other conditions associated with micronodular adrenal hyperplasias. *Best Pract Res Clin Endocrinol Metab* 24:907–14, 2010. [An excellent review on the genetic bases of Carney complex from one of the most prolific research groups in this entity]
- Arnaldi G, Boscaro M: Adrenal incidentaloma. *Best Pract Res Clin Endocrinol Metab* 26:405–19, 2012. [A clinically oriented review on incidental lesions of the adrenal glands]
- Bornstein SR: Predisposing factors for adrenal insufficiency. *N Engl J Med* 360:2328–39, 2009. [An outstanding review on etiological bases for adrenal insufficiency, with a discussion of etiopathogenesis, clinical features and treatment]
- Carroll TB, Findling JW: The diagnosis of Cushing's syndrome. *Rev Endocr Metab Disord* 11:147–53, 2010. [A clinically oriented review on Cushing syndrome, including relevant laboratory tests that establish diagnosis]
- Choi M, Scholl UI, Yue P, et al: K+ channel mutations in adrenal aldosterone-producing adenomas and hereditary hypertension. *Science* 331:768–72, 2011. [Original research study on the genetic basis for a subset of aldosterone-producing adenomas which cause severe hypertension to run in some families]
- Kisand K, Boe Wolff AS, Podkrajsek KT, et al: Chronic mucocutaneous candidiasis in APECED or thymoma patients correlates with autoimmunity to Th17-associated cytokines. *J Exp Med* 207:299–308, 2010. [Original research study describing the role of neutralizing autoantibodies against Th17-associated cytokines like IL-17 and IL-22 in the pathogenesis of chronic mucocutaneous candidiasis]

Adrenal Medulla

- Friderichsen C: Nebennierenapoplexie bei kleinen Kindern. *Jahrbuch für Kinderheilkunde* 87:109–25, 1918. [One of the two original descriptions of the eponymously named Waterhouse-Friderichsen syndrome; Friderichsen was a Danish pediatrician]
