

Schmidt S, Moser M, Sperandio M: The molecular basis of leukocyte recruitment and its deficiencies. *Mol Immunol* 55:49–58, 2013. [A review of the mechanisms of leukocyte recruitment and leukocyte adhesion deficiencies.]

Williams MR, Azcutia V, Newton G, et al: Emerging mechanisms of neutrophil recruitment across endothelium. *Trends Immunol* 32:461–9, 2011. [A review of the stimuli for leukocyte migration through blood vessels and the signaling pathways activated in leukocytes in response to these stimuli.]

Mediators of Inflammation

Andersson U, Tracey KJ: Neural reflexes in inflammation and immunity. *J Exp Med* 209:1057–68, 2012. [A thoughtful review that explores the mechanisms by which neural reflexes may influence inflammatory reactions.]

Charo IF, Ransohoff RM: The many roles of chemokines and chemokine receptors in inflammation. *N Engl J Med* 354:610, 2006. [An overview of the functions of chemokines in inflammation.]

Di Gennaro A, Haeggström JZ: The leukotrienes: immune-modulating lipid mediators of disease. *Adv Immunol* 116:51–92, 2012. [A comprehensive review of the biochemistry of leukotrienes and their receptors, and the roles of these mediators in various diseases.]

Gabay C, Lamacchia C, Palmer G: IL-1 pathways in inflammation and human diseases. *Nat Rev Rheumatol* 6:232, 2010. [An excellent review of the biology of IL-1 and the therapeutic targeting of this cytokine in inflammatory diseases.]

Keystone EC, Ware CF: Tumor necrosis factor and anti-tumor necrosis factor therapies. *J Rheumatol Suppl* 85:27–39, 2010. [An excellent review of TNF and its receptors, and the development and clinical efficacy of TNF inhibitors.]

Khanapure SP, Garvey DS, Janero DR, et al: Eicosanoids in inflammation: biosynthesis, pharmacology, and therapeutic frontiers. *Curr Top Med Chem* 7:311, 2007. [A summary of the properties of this important class of inflammatory mediators.]

Nathan C, Cunningham-Bussel A: Beyond oxidative stress: an immunologist's guide to reactive oxygen species. *Nat Rev Immunol* 13:349–61, 2013. [An excellent modern review of the production, catabolism, targets and actions of reactive oxygen species, and their roles in inflammation.]

Ricklin D, Lambris JD: Complement in immune and inflammatory disorders. *J Immunol* 190:3831–8, 3839–47, 2013. [Two companion articles on the biochemistry and biology of the complement system, and the development of therapeutic agents to alter complement activity in disease.]

Zlotnik A, Yoshie O: The chemokine superfamily revisited. *Immunity* 36:705–16, 2012. [An excellent update on the classification, functions, and clinical relevance of chemokines and their receptors.]

Chronic Inflammation: Role of Macrophages and Other Cells

Caielli S, Banchereau J, Pascual V: Neutrophils come of age in chronic inflammation. *Curr Opin Immunol* 24:671–7, 2012. [A discussion of the underappreciated role of neutrophils in disorders characterized by chronic inflammation.]

Nagy JA, Dvorak AM, Dvorak HF: VEGF-A and the induction of pathological angiogenesis. *Annu Rev Pathol* 2:251, 2007. [A review of the VEGF family of growth factors and their role in angiogenesis in cancer, inflammation, and various disease states.]

Nathan C, Ding A: Nonresolving inflammation. *Cell* 140:871, 2010. [A discussion of the abnormalities that lead to chronic inflammation.]

Sica A, Mantovani A: Macrophage plasticity and polarization: in vivo veritas. *J Clin Invest* 122:787–95, 2012. [An excellent review of macrophage subpopulations, their generation, and their roles in inflammation, infections, cancer, and metabolic disorders.]

Sepsis

Aziz M, Jacob A, Yang WL, et al: Current trends in inflammatory and immunomodulatory mediators in sepsis. *J Leukoc Biol* 93:329–42, 2013. [A comprehensive review of the roles of cytokines and other mediators in the development and resolution of the systemic inflammatory response syndrome.]

Stearns-Kurosawa DJ, Osuchowski MF, Valentine C, et al: The pathogenesis of sepsis. *Annu Rev Pathol* 6:19–48, 2011. [An excellent review of the pathogenesis of sepsis, focusing on the cells involved, the importance of cell death, the links between inflammation and coagulation, the utility of biomarkers, and therapeutic approaches.]

Tissue Repair: Regeneration and Fibrosis

Daley GQ: The promise and perils of stem cell therapeutics. *Cell Stem Cell* 10:740–9, 2012. [An excellent summary of the challenges in the development of stem cell based therapies, and the potential of such treatments.]

Friedman SL, Sheppard D, Duffield JS, et al: Therapy for fibrotic diseases: nearing the starting line. *Sci Transl Med* 5:167sr1, 2013. [An excellent review of the current concepts of the pathogenesis of fibrosis, emphasizing the roles of different cell populations and the extracellular matrix, and the potential for translating basic knowledge to the development of new therapies.]

Grompe M: Tissue stem cells: new tools and functional diversity. *Cell Stem Cell* 10:685–9, 2012. [A brief overview of the properties and identification of stem cells in different tissues.]

Gurtner GC, Werner S, Barrandon Y, et al: Wound repair and regeneration. *Nature* 453:314–21, 2008. [A thoughtful discussion of the mechanisms of repair after tissue damage in mammals.]

Hernandez-Gea V, Friedman SL: Pathogenesis of liver fibrosis. *Annu Rev Pathol* 6:425–56, 2011. [A comprehensive discussion of the mechanisms of fibrosis in the liver, emphasizing the roles of different cells and matrix proteins and the molecular control of the process.]

Hubmacher D, Apte SS: The biology of the extracellular matrix: novel insights. *Curr Opin Rheumatol* 25:65–70, 2013. [A brief review of the structural and biochemical properties of the ECM.]

Klingberg F, Hinz B, White ES: The myofibroblast matrix: implications for tissue repair and fibrosis. *J Pathol* 229:298–309, 2013. [An excellent review of the properties of myofibroblasts and ECM proteins, and their roles in tissue repair and fibrosis.]

Mantovani A, Biswas SK, Galdiero MR, et al: Macrophage plasticity and polarization in tissue repair and remodelling. *J Pathol* 229:176–85, 2013. [An excellent review comparing macrophage subsets and the role of these cells in the resolution of inflammation and tissue repair.]

Murawala P, Tanaka EM, Currie JD: Regeneration: the ultimate example of wound healing. *Semin Cell Dev Biol* 23:954–62, 2012. [A thoughtful discussion of the process of regeneration in amphibians and how and why it is different in mammals.]

Novak ML, Koh TJ: Macrophage phenotypes during tissue repair. *J Leukoc Biol* 93:875–81, 2013. [A review of macrophage phenotypes and how they change during inflammation and tissue repair, emphasizing the concept that these phenotypes are plastic and dynamic and may not represent committed lineages.]

Okita K, Yamanaka S: Induced pluripotent stem cells: opportunities and challenges. *Philos Trans R Soc Lond B Biol Sci* 366:2198–207, 2011. [A review of the exciting technology for generating iPSC cells for regenerative medicine.]

Page-McCaw A, Ewald AJ, Werb Z: Matrix metalloproteinases and the regulation of tissue remodelling. *Nat Rev Mol Cell Biol* 8:221, 2007. [A review of the function of matrix modifying enzymes in tissue repair.]

Van Dyken SJ, Locksley RM: Interleukin-4- and interleukin-13-mediated alternatively activated macrophages: roles in homeostasis and disease. *Annu Rev Immunol* 31:317–43, 2013. [An excellent review of the generation and functions of alternatively activated macrophages.]

Wick G, Grundtman C, Mayerl C, et al: The immunology of fibrosis. *Annu Rev Immunol* 31:107–35, 2013. [An excellent review of the role of the immune system in fibrosis during tissue repair and in chronic diseases, including autoimmune disorders, atherosclerosis, fibrotic disorders of different organs, and cancer.]

Wynn TA, Ramalingam TR: Mechanisms of fibrosis: therapeutic translation for fibrotic disease. *Nat Med* 18:1028–40, 2012. [An excellent review of the mechanisms of tissue fibrosis and the antifibrotic therapeutic strategies being developed.]
