

- Cellular receptors, for microbes, products of damaged cells and foreign substances, 187-188, 187f
- Cellular rejection, 577
- Cellular responses
to stress and noxious stimuli, 32-34, 32f, 33t
to stress and toxic insults, 31-68
adaptations of cellular growth and differentiation as, 34-38
apoptosis as, 52-59, 58b
autophagy as, 33-34, 60-61, 60f, 61b
cell death as. *See* Cell death
cell injury as. *See* Cell injury
cellular aging as, 66-68, 68b
intracellular accumulations as, 61-65, 66b
necrosis as. *See* Necrosis
pathologic calcification as, 65-66
- Cellular swelling, in cell injury, 40-41, 41b
- Cellulitis, orbital, 1320-1321
- Celsus, 71
- Central artery, of eye, 1320f
- Central chromatolysis, 1252
- Central-core disease, 1241t
- Central nervous system (CNS), 1251-1318
cellular pathology in, 1252-1254, 1254b
cerebral edema as, 1254-1255, 1255b-1256b
cerebrovascular disease as, 1263-1271, 1271b
hypertensive, 1267-1268
hypoxia, ischemia, and infarction as, 1263-1267, 1265f, 1266f, 1267f, 1268f
intracranial hemorrhage as, 1268-1271, 1269f
demyelinating, 1283-1286, 1286b
acute disseminated encephalomyelitis as, 1286
acute necrotizing hemorrhagic encephalomyelitis as, 1286
central pontine myelinolysis as, 1286
multiple sclerosis as, 1283-1285, 1284f, 1285f
neuromyelitis optica as, 1285-1286
hydrocephalus as, 1254-1255, 1254f, 1255b-1256b
infections in, 1271-1280, 1272t, 1280b-1281b
abscess
brain, 1273-1274
extradural, 1274
acute focal suppurative, 1273-1274
acute meningitis as, 1272-1273
meningoencephalitis as
chronic bacterial, 1274-1275
fungal, 1279
viral, 1275-1279
protozoal, 1279-1280
subdural empyema as, 1274
malformations and developmental diseases as, 1256-1258, 1258b
of forebrain, 1256-1258
neural tube defects as, 1256
of posterior fossa, 1258, 1258f
syringomyelia and hydromyelia as, 1258
metabolic diseases as
acquired, 1304-1305, 1306b
Alexander disease as, 1303
due to hyperglycemia, 1305
due to hypoglycemia, 1304-1305
due to vitamin deficiencies, 1304
genetic, 1302-1304, 1304b
- Central nervous system (CNS) (*Continued*)
hepatic encephalopathy as, 1305
Krabbe disease as, 1302, 1303f
Leigh syndrome as, 1304
leukodystrophies as, 1283, 1302-1303
mitochondrial encephalomyopathies as, 1302-1304
myoclonic epilepsy and ragged red fibers as, 1304
neuronal storage diseases as, 1302
Pelizaeus-Merzbacher disease as, 1303
Tay-Sachs disease, 1302
neurodegenerative, 1286-1301, 1287t-1288t, 1301b
Alzheimer disease as, 1287-1292, 1289f, 1290f, 1291f
amyotrophic lateral sclerosis as, 1300-1301, 1301f
ataxia-telangiectasia as, 1299-1300
atypical parkinsonism syndromes as, 1296
corticobasal degeneration as, 1296
dementia with Lewy bodies as, 1295-1296
Friedreich ataxia as, 1299
frontotemporal dementia as, 1292
Huntington disease as, 1297-1298, 1298f
of motor neurons, 1301
multiple system atrophy as, 1296-1297
Parkinson disease as, 1294-1296, 1295f
Pick disease as, 1292, 1293f
progressive supranuclear palsy as, 1296
spinal and bulbar muscular atrophy (Kennedy disease) as, 1301
spinal muscular atrophy as, 1301
spinocerebellar, 1298-1300
vascular (multi-infarct) dementia as, 1268
perinatal brain injury as, 1258-1259, 1263b
raised intracranial pressure and herniation as, 1254-1255, 1255b-1256b, 1255f
toxic, 1304-1305, 1306b
trauma, 1259-1263
concussion as, 1259
diffuse axonal injury as, 1261
parenchymal injuries as, 1259-1261
sequelae of, 1262-1263
skull fractures as, 1259
spinal cord, 1263
vascular injury, 1261-1262, 1261t
tumors, 1306-1317, 1317b-1318b
astrocytoma as, 1306-1309, 1307f, 1309f
atypical teratoid/rhabdoid tumor as, 1313
ependymoma as, 1310-1311, 1311f
familial tumor syndromes of, 1316-1317
germ cell tumors as, 1314
gliomas as, 1306-1311
medulloblastoma as, 1312-1313, 1313f
meningiomas as, 1314-1315, 1315f
metastatic, 1315-1316
neurofibromatosis as, 1317
neuronal, 1311-1312
other parenchymal, 1313-1314
paraneoplastic syndromes due to, 1316
pineal parenchymal tumors as, 1314
poorly differentiated, 1312-1313
primary CNS lymphoma as, 1313-1314
- Central nervous system involvement
in AIDS, 255
pathogenesis of, 250
in systemic lupus erythematosus, 222b-225b
- Central neurocytoma, 1312
- Central pontine myelinolysis, 1286
- Central tolerance, 212-213
- Central vein, of eye, 1320f
- Centrilobular necrosis, 864-865
in right-sided heart failure, 530
- Centrioblasts, 595b
- Centrocytes, 595b
- Centronuclear myopathy, 1241t
- Cerebral amebiasis, 1280, 1281f
- Cerebral amyloid angiopathy (CAA), 1269, 1269b, 1290b-1292b
- Cerebral autosomal dominant arteriopathy with subcortical infarcts and leukoencephalopathy (CADASIL), 1269
- Cerebral edema, 1254
- Cerebral infarction, 1263-1267, 1265f, 1266f
due to global cerebral ischemia, 1264
hemorrhagic, 1267f
nonhemorrhagic, 1266b-1267b, 1267f
- Cerebral ischemia, 1263-1267, 1266f
focal, 1264-1267
global, 1264
- Cerebral malaria, 1280
malignant, 391b-392b, 392f
- Cerebral palsy, 1258-1259
- Cerebral toxoplasmosis, 1279-1280, 1280b, 1281f
- Cerebrospinal fluid (CSF), Guillain-Barré syndrome and, 1231
- Cerebrovascular disease, 1263-1271, 1263b, 1271b
in Global Burden of Disease, 405
hypertensive, 1267-1268
hypoxia, ischemia, and infarction as, 1263-1267, 1265f, 1266f, 1267f, 1268f
intracranial hemorrhage as, 1268-1271, 1269f
- Ceruloplasmin, 80
- Cervical cancer, oral contraceptives in, 421
- Cervical carcinoma, 1004-1006
human papillomaviruses and, 992, 1002, 1004-1005
screening and prevention for, 1006-1007, 1006f
- Cervical intraepithelial neoplasia (CIN), 1003-1004, 1003b, 1003t, 1004f
- Cervical lymphoepithelial cyst, 741
- Cervicitis, acute and chronic, 1001-1002
- Cervicovaginal smear, in cancer, 333f
- Cervix, 1001-1007
endocervical polyps of, 1002, 1002f
inflammations of, 1001-1002
premalignant and malignant neoplasms of, 1002-1006
cervical carcinoma as, 1004-1006
cervical intraepithelial neoplasia, 1003-1004, 1003b, 1003t
squamous intraepithelial lesions, 1003-1004, 1003b, 1005t
- Cesarean section, 1037
- Cestodes. *See* Tapeworms.
- Chagas disease, 394-395, 395b
- Chagoma, 394
- α chain, 194
- β chain, 194-195
- Chalazion, 1322
- Chalk stick-type fractures, 1190-1191
- Chancroid, 370, 370b
