

- Human papillomavirus (HPV), 276
 and cervical carcinoma, 1002, 1004-1005
 and condyloma acuminatum of penis, 970-971
 female genital tract with, 992
 oncogenic potential of, 326-327, 326f
 and penile carcinoma, 971-972, 972b
 and vulvar intraepithelial neoplasia, 997, 998f
- Human T-cell leukemia virus type 1 (HTLV-1), 325-326
- Humoral immunity, 189, 198-199
- Hunner ulcers, 962-963
- Hunter, John, 71
- Hunter syndrome, 154
- Huntingtin, 141, 1297
- Huntington disease (HD), 1297-1298, 1297b, 1298f
- Hurler syndrome, 155
- Hürthle cells, 1087b, 1087f, 1094f
- Hyalin, 902
- Hyaline arteriosclerosis, 490b
 in benign nephrosclerosis, 939f
 due to diabetes mellitus, 1117b-1119b
- Hyaline cartilage, 1207-1208
- Hyaline change, 63
- Hyaline membrane disease, 457, 458f
- Hyaluronan, 22f, 23-24
- Hydatid cysts, 839
- Hydatid disease, 396
- Hydatidiform mole, 1039-1041, 1040b, 1040f
- Hydatids of Morgagni, 1021-1022
- Hydrocarbons, 415-416
- Hydrocele, 980
- Hydrocephalus, 1254-1255, 1254f
 ex vacuo, 1254-1255
 posttraumatic, 1263
- Hydrogen peroxide (H₂O₂)
 cell injury due to, 48t
 in phagocytosis, 79
- Hydromyelia, 1258
- Hydronephrosis, 950, 951f, 960-961
- Hydropic swelling, 1143t
- Hydrops, corneal, 1326b
- Hydrops fetalis, due to α -thalassemia, 642
- Hydrosalpinx, 995b
- Hydrostatic pressure, increased, edema due to, 114
- Hydroureter, 960-961
- Hydroxychloroquine, 1240
- 25-Hydroxycholecalciferol (25-OH-D), 438, 439f
- 5-Hydroxyeicosatetraenoic acid, in inflammation, 85
- Hydroxyl radical
 cell injury due to, 48t
 in inflammation, 79
- 5-Hydroxytryptamine, in inflammation, 83
- Hygiene hypothesis, 204
- Hyper-IgM syndrome, 241
- Hyperacute rejection, 233b-234b, 234f
- Hyperadrenalism. *See* Adrenocortical hyperfunction.
- Hyperaldosteronism
 clinical course of, 1126-1127
 morphology of, 1126b
 primary, 1125-1127, 1126f
 secondary, 1126
- Hyperbilirubinemia, due to hemolytic anemia, 632
- Hypercalcemia
 causes of, 1103t
 causes of, in metastatic calcification, 65
- Hypercalcemia (*Continued*)
 and nephrocalcinosis, 937
 paraneoplastic syndromes and, 330
- Hypercholesterolemia, and atherosclerosis, 492-493
- Hypercoagulability, in thrombosis, 123-125, 123t
- Hypercortisolism, 1123-1125, 1125b
- Hyperdynamic circulation, 828-830
- Hyperemia, 115-116
- Hyperestrogenemia, 828
- Hyperglycemia
 neurologic sequelae of, 1305
 in septic shock, 133
- Hypergranulosis, 1143t
- Hyperinsulinemia, obesity and cancer, 447
- Hyperinsulinism, 1121, 1121b
- Hyperkeratinization, of the epidermis, due to vitamin A deficiency, 438
- Hyperkeratosis, 1143t
- Hyperlipidemia, and atherosclerosis, 492-493
- Hyperosmolar hyperosmotic syndrome (HHS), 1115
- Hyperparathyroidism, 1101-1104, 1103f, 1104b, 1191-1192, 1191b-1193b, 1192f
 clinical features of, 1103
 morphology of, 1102b-1103b
 primary, 1101-1103, 1136
 secondary, 1103-1104
- Hyperpituitarism, 1075-1080, 1080b
- Hyperplasia, 35-36, 453-454
 compensatory, 36
 hormonal, 36
 mechanisms of, 36
 pathologic, 36
 physiologic, 36
- Hyperplastic arteriosclerosis, 490b
- Hyperprolactinemia, 1079
- Hypersensitivity, 200
- Hypersensitivity diseases, classification of, 200-201
- Hypersensitivity pneumonitis, 694-695
 organic dusts that induce, 688t
- Hypersensitivity reactions
 delayed-type, chronic inflammation due to, 93
 inflammation due to, 72
 mechanisms of, 201t
- Hypersplenism, 624
- Hypertension, 491b, 493
 aortic dissection, 504
 chronic, 493
 environmental factors, 490
 essential, 487, 490
 pathogenesis of, 490
 during pregnancy, 457
 in retinal vascular disease, 1333-1334, 1335f
 secondary, 490
 types and causes of, 488t
 vascular pathology in, 490-491, 491f
- Hypertensive cerebrovascular disease, 1267-1268
- Hypertensive encephalopathy, 1268
- Hypertensive heart disease (HHD), 552-553, 552b-553b
 pulmonary (right-sided), 553, 553f, 553t
 systemic (left-sided), 552-553, 553f
- Hypertensive vascular disease, 487-491
 hypertension, 427
- Hyperthyroidism, 206t, 1083-1085, 1084f
 clinical course of, 1083-1085
 Graves disease, 1089
- Hypertonicity, plasma membrane, 9
- Hypertrophic cardiomyopathy, 568-570, 569b, 569f
- Hypertrophic osteoarthropathy, due to cancer, 331-332
- Hypertrophy, 33f, 34f, 34-35, 453-454
 mechanisms of, 34-35, 35f
- Hyperuricemia, 1215
- Hyperviscosity, and thrombosis, 123
- Hyperviscosity syndrome, 602
- Hypervitaminosis A, 438
- Hypervitaminosis D, in children, 442
- Hypoadrenalism, 1131b
 secondary, 1132b
- Hypocalcemia, 440
- Hypocalcemic tetany, 438
- Hypochlorite, in phagocytosis, 79
- Hypocholesterolemia, 1184t
- Hypochromic microcytic anemia, 629-630
 of iron deficiency, 652, 652f
- Hypocitaturia, 951-952
- Hypoglycemia, 1115
 neurologic sequelae of, 1304-1305
- Hypogonadism, 828
- Hypokalemia, 1127
- Hypoparathyroidism, 1104-1105
- Hypopituitarism, 1075, 1080-1081
 genetic defects, 1081
 radiation, 1080
- Hypoplasia, 453-454
 pulmonary, 670
- Hypoplastic left heart syndrome, 537-538
- Hypoproteinemia, edema due to, 114
- Hypopyon, 1325
- Hypospadias, 970
- Hypotension. *See* Low blood pressure.
- Hypothalamic lesions, 1081
- Hypothalamic suprasellar tumors, 1082, 1082b
- Hypothalamus-pituitary-thyroid axis, 1083f
- Hypothermia, 427
- Hypothyroidism, 1085-1086
 autoimmune, 1085
 causes of, 1085t
 cretinism, 1085-1086
 Hashimoto thyroiditis, 1089
 iatrogenic, 1085
 myxedema, 1086
- Hypotonic infant, differential diagnosis of, 1245-1246
- Hypotonicity, plasma membrane, 9
- Hypotrophy, 453-454
- Hypoventilation syndrome, obesity in, 448
- Hypoxia, 39
 cerebral, 1263-1267
 inflammation due to, 70-71
- Hypoxia-inducible factor-1, 51
- Hypoxic cell injury, 50-51
- Hypoxic encephalopathy, in left-sided heart failure, 529
