

- Merkel cell, 1142
Merlin, 298, 1247
Merozoites, of malaria, 390-391
Mesangial cells, 900, 901f
Mesangial proliferative lupus nephritis, 222b-225b
Mesenchymal chondrosarcoma, 1202b
Mesenchymal stem cells, 28
Mesenchymal tumors
 of bladder, 968
 of prostate, 990
Mesial temporal herniation, 1255
Mesonephric ducts, 992, 992f
Metabolic abnormalities, in septic shock, 133
Metabolic acidosis, due to shock, 134
Metabolic diseases
 of central nervous system
 acquired, 1304-1305
 Alexander disease as, 1303
 due to hyperglycemia, 1305
 due to hypoglycemia, 1304-1305
 due to vitamin deficiencies, 1304
 genetic, 1302-1304
 hepatic encephalopathy as, 1305
 Krabbe disease as, 1302, 1303f
 Leigh syndrome as, 1304
 leukodystrophies as, 1283, 1302-1303
 mitochondrial encephalomyopathies as, 1302-1304
 myoclonic epilepsy and ragged red fibers as, 1304
 neuronal storage diseases as, 1302
 Pelizaeus-Merzbacher disease as, 1303
 neurologic sequelae of, 1304-1305
Metabolic ketoacidosis, 1114
Metabolic liver disease, 845-852
Metabolic syndrome, 447, 447f, 494
Metabolism, cell growth and, in cancer, 301f
Metachromasia, 1302-1303
Metachromatic leukodystrophy, 1302-1303
Metals, in environmental pollution, 410-413, 413b
Metaphyseal dysplasia, 1184t
Metaphyseal fibrous defects, 1204-1205
Metaplasia, 270-271
 columnar to squamous, 37-38, 38f
 connective tissue, 38
 mechanisms of, 38
 squamous to columnar, 38
Metaplastic carcinoma, of breast, 1066
Metaplastic lesions, of bladder, 963-964
Metaplastic theory, of endometriosis, 1010
Metastasis(es), 272-275, 306-310
 of breast cancer, 272f, 1064, 1066
 determination of site of origin of, 334
 invasion of extracellular matrix in, 306-308
 molecular genetics of, 309, 309f
 of prostate cancer, 985-986, 986f
 role of stromal elements in, 309-310
 vascular dissemination and homing of tumor cells in, 308-309
"Metastasis oncogenes", 309
"Metastasis signature", 309
"Metastasis suppressor genes", 309
Metastatic calcification, 65-66
Metastatic cascade, 306, 307f
Metastatic neoplasms, in Waterhouse-Friderichsen syndrome, 1131
Metastatic tumors, 1207
 of ovaries, 1034
Metazoa, 395-400
Metchnikoff, Elie, 71
Methamphetamine, 424-425
Methane, in greenhouse effect, 405-406
Methanol, CNS toxicity of, 1305
Methemoglobin, 631
Methicillin-resistant *Staphylococcus aureus* (MRSA), 364
Methotrexate, for rheumatoid arthritis, 1212
Methyl methacrylate, 1214
 α -methylacyl-coenzyme A-racemase (AMACR), in prostate cancer, 986
Methylation abnormalities, 893
Methylcobalamin, 647, 647f
3,4-Methylenedioxymethamphetamine (MDMA), 425
Methylmalonic acid, in vitamin B₁₂ deficiency, 647
MHC. *See* Major histocompatibility complex (MHC).
Microaneurysms, 1117b-1119b, 1336
Microangiopathic hemolytic anemia, 644, 644f
Microangiopathy, thrombotic, 659
Microbe(s)
 immune evasion by, 345-347, 346f, 347b
 routes of entry of, 342-344, 342f
 spread and dissemination of, 344-345, 344f, 345b
 vertical transmission, 344
Microbial carcinogenesis, 325-329
 Helicobacter pylori as, 329
 oncogenic DNA viruses as, 326-329
 oncogenic RNA viruses as, 325-326
Microbicide activity, inherited defects in, 238
Microbiome, 342
Microcytic hypochromic anemia, 629-630
 of iron deficiency, 652, 652f
Microencephaly, 1257
Microglia, reactions to injury of, 1253
Microglial nodules, 1253
 in arthropod-borne viral encephalitis, 1275b, 1276f
 in HIV encephalitis, 1278b
 β_2 -microglobulin, in amyloidosis, 258
Micronodular hyperplasia, 1124b, 1124f
Microorganism, 342-345
Micropapillary carcinoma, 1065
MicroRNAs (miRNAs), 4-5
 in cancer, 320
 generation of, 5f
Microsatellite instability, 314
Microscopic polyangiitis, 510-511, 510b
 glomerular lesions in, 926-927
Microsomal ethanol-oxidizing system, 418f
Microtubules, 11
Microvascular occlusions, in sickle cell disease, 636, 636f
Migratory thrombophlebitis, 126, 514
 due to cancer, 332
Mikulicz syndrome, 227
Milk-alkali syndrome, 65
Milk line remnants, 1044
Milroy disease, 515
Minamata disease, 412
Mineral dusts, inhalation of, 414
Mineralocorticoids, 1122
Minimal mesangial lupus nephritis, 222b-225b
Minimal residual disease, detection of, 335
Mininutritional Assessment (MNA), 434
Misfolded proteins, accumulation of, apoptosis due to, 53
Missense mutations, 138
Mitochondria, 6
 energy generation of, 14
 function of, 14-15
 roles of, 15f
Mitochondrial damage, cell injury due to, 46, 46f
Mitochondrial DNA (mtDNA), 171-172, 172f
Mitochondrial dysfunction, in Parkinson disease, 1295
Mitochondrial encephalomyopathies, 1303-1304
Mitochondrial encephalomyopathy, lactic acidosis, and stroke-like episodes (MELAS), 1303
Mitochondrial genes, mutations in, 171-172
Mitochondrial membrane damage, 49
Mitochondrial myopathies, 1245
 morphology of, 1245b
Mitochondrial pathway, of apoptosis, 55f
Mitoses, in neoplasia, 270
Mitotic crisis, evasion of, 303, 304f
Mitral annular calcification, 556
Mitral valve prolapse (MVP), 556, 556b
 in Marfan syndrome, 145b
Mixed-cellularity type, of Hodgkin lymphoma, 607b-610b, 609f
Mixed connective tissue disease, 231
Mixed tumors, 266-267, 267f
 testicular, 979
Mobile genetic elements, 2
Molds, 388-390
Moldy hay, hypersensitivity pneumonitis due to, 688t
Molecular and cytogenetic diagnostics
 for detection of minimal residual disease, 335
 of hereditary predisposition to cancer, 335
 of malignant neoplasms, 334-335
 for prognosis of malignant neoplasms, 335
Molecular chaperone therapy, for lysosomal storage diseases, 150
Molecular genetic diagnosis, 174-182
 array-based comparative genomic hybridization in, 177-178
 for epigenetic alterations, 180
 for genome-wide analyses, 179-180
 for genomic alterations, 176-178
 polymorphic markers in, 178-180
 RNA analysis in, 180
 southern blotting, 177, 177f
Molecular mimicry, in autoimmunity, 216
Molecular profiles, of tumors, 335-336
Molluscum contagiosum, 993-994, 994f, 1175, 1175b-1176b, 1176f
Mönckeberg medial sclerosis, 491
Monoclonal gammopathies, neuropathies associated with, 1234
Monoclonal gammopathy of undetermined significance (MGUS), 599, 601, 602b
Monocyte(s)
 differentiation of, 580f
 in glomerular injury, 907
 in inflammation
 acute, 78
 chronic, 94, 95f
 in innate immunity, 187
Monocyte chemoattractant protein (MCP-1), 87
Monodermal teratomas, 1030
Mononeuritis multiplex, 1230
Mononeuropathies, 1230
