

- Regulatory genes, in cancer, 280, 319t
 Regulatory T cells (Tregs), 213-214
 induction of, in immune evasion, 313
 Regurgitation theory, of endometriosis, 1010
 Relapsing febrile nodular panniculitis, 1175
 Renal artery stenosis, 940-941, 940b-941b
 Renal atherosclerosis, 1117b-1119b
 Renal calculi, 951-952, 951t, 952b
 Renal cell cancer syndrome, 1223
 Renal cell carcinoma, 953-955, 954f, 955f
 classification of, 953-954
 clinical features of, 955
 epidemiology of, 953
 morphology of, 954b-955b, 954f, 955f
 Renal cortex, 1118f
 Renal diseases, 898
 atheroembolic, 943, 943f
 atherosclerotic ischemic, 943
 clinical manifestations of, 898-899, 899b
 congenital anomalies as, 944-945
 agenesis as, 944
 ectopic kidneys as, 945
 horseshoe kidneys as, 945
 hypoplasia as, 944-945
 vascular, 938-944
 diffuse cortical necrosis as, 944, 944b, 944f
 renal infarcts as, 944, 944b
 Renal disorder, and systemic lupus erythematosus, 218t
 Renal failure
 chronic, 898, 900t
 in hyperparathyroidism, 1103-1104
 Renal glomerulus, 1118f
 Renal hyaline arteriosclerosis, 1117f
 Renal infarcts, 944, 944b
 Renal medulla, cystic diseases of, 948-949
 Renal osteodystrophy, 1104, 1192-1193, 1192f, 1193b
 Renal papillary adenoma, 952, 952b
 Renal pelvis, urothelial carcinoma of, 955-956, 956f
 Renal sodium, excretion, 490
 Renal stones. *See* Nephrolithiasis.
 Renal tubular defects, 898-899
 Renin, in blood pressure regulation, 489
 Renin-angiotensin system, in blood pressure regulation, 488, 489f
 Renovascular hypertension, 490
 Repair, 100
 by connective tissue deposition, 102-105
 cutaneous wound healing and pathologic aspects of, 110b
 by regeneration, 102b
 by scar formation, 105b
 Reperfusion, of myocardial infarction, 545-547, 546f
 Reperfusion injury, 546-547, 546f
 Replicative potential, limitless, in cancer, 283, 305b
 Replicative senescence, 66f, 67f, 67
 Resident glomerular cells, in glomerular injury, 907
 Resolution, 106
 Resorption atelectasis, 671
 Respiratory burst, in phagocytosis, 79
 Respiratory diseases, climate change and, 406
 Respiratory distress syndrome (RDS), in newborn, 457, 458f
 Respiratory tract, infections via, 342t, 343
 Response to injury, vascular wall, 485-487
 Restriction fragment length analysis, 176
 Restrictive cardiomyopathy, 570
 RET gene, in thyroid, 1095
 Reticular hyperplasia, 585b
 Reticulocyte count, adult reference range for, 631t
 Reticulocytosis, 631
 in hemolytic anemia, 632
 Reticuloendothelial system, in chronic inflammation, 94
 Retina, 1320f, 1332-1339, 1340b
 Retinal, 436
 Retinal detachment, 1333, 1334f
 Retinal pigment epithelium (RPE), 1332-1333
 Retinal vasculitis, 1336-1337
 Retinitis, 1339
 Retinitis pigmentosa, 1339
 Retinoblastoma, 1339, 1339b, 1340f
 pathogenesis of, 292f
 Retinoblastoma (RB) gene, in pituitary tumors, 1076t
 Retinoic acid, 436
 Retinoic acid receptors (RARs), 437
 Retinoic X receptor (RXR), 407
 Retinoids, 437
 metabolic effects of, 437
 Retinol, 436
 Retinopathy, of prematurity, 459, 1336-1338
 Retrolental fibroplasia, 1336-1338
 Retroviral syndrome, acute, 250-252
 Rhabdomyoma, cardiac, 576, 576b
 Rhabdomyosarcoma, 270f, 1222, 1223f
 embryonal, of bladder, 968
 Rhegmatogenous retinal detachment, 1333
 Rhesus immune globulin (RhIg), 462
 Rheumatic fever, 557-559, 558b-559b
 acute, 206t
 Rheumatic heart disease, 557-559, 558b-559b, 558f
 Rheumatic mitral valve stenosis, and thrombosis, 123
 Rheumatoid arthritis, 209t, 226, 687, 1209-1212, 1210f, 1211f, 1212f, 1211b
 autoantibodies in, 219t
 HLA alleles and, 215t
 Rheumatoid factor, 1210
 Rheumatoid spondylitis, 1213
 Rheumatoid subcutaneous nodules, 1211b, 1211f
 Rheumatoid vasculitis, 512-513
 Rheumatologic disorders, heart disease associated with, 575
 Rhinitis, chronic, 735
 Rhinocerebral mucormycosis, 389b-390b
 Rhodopsin, 436-437
 Ribavirin, 706-707
 Richter syndrome, 594
 Rickets, 438, 440-441, 1191
 Rickettsial infections, 384-385, 385b
 Riedel thyroiditis, 1088-1089
 RIG-like receptors (RLRs), 188
 Right bundle branches, 525
 Right-sided heart failure, 530
 Right-sided hypertensive heart disease, 553, 553f, 553t
 Right-to-left shunts, 533, 535-537, 536f
 due to persistent truncus arteriosus, 535
 due to tetralogy of Fallot, 535-536, 536f
 due to total anomalous pulmonary venous connection, 535
 due to transposition of the great arteries, 536-537, 536f
 due to tricuspid atresia, 535
 Ring chromosome, 160, 160f
 RNA analysis, 180
 Robertsonian translocation, 160-161, 160f
 Rocky Mountain spotted fever, 384, 385b, 385f
 Rod cells, 1253
 Rodent ulcers, 1157b
 Rosacea, 1173-1174, 1174b
 Rosenthal fibers, 1253
 Rotor syndrome, 854t
 Rough endoplasmic reticulum (RER), 6
 Rouleaux formation, 599b
 Rubor, 71, 93
 RUNX2, 1182
 Rupture of membranes (ROM), preterm premature, 456
 RYR1, mutations of, 1246
 S
 S-100, 1135
 Saccular aneurysms, 501
 ruptured, 1269-1271, 1270b, 1270f
 Sacrococcygeal teratomas, in infants and children, 474-475, 475f
 Salpingitis
 chronic, 995b, 995f
 suppurative, 1021
 acute, 995, 995f
 tuberculous, 1021
 Salpingo-oophoritis, 995b
 Salt retention, edema due to, 114
 Salt-wasting syndrome, 1128
 Sanger sequencing, 175-176
 SAP gene, 312-313
 Sarcoidosis, 98
 Sarcolemma, 1235
 Sarcoma(s), 266, 1219-1220, 1219t
 of bladder, 968
 botryoides, 1222b
 of bladder, 968
 of breast, 1070
 cardiac, 576
 Sarcomeres, of myocardium, 524
 Sarcoplasmic reticulum, 12
 Satellite cells, 101
 Scale, 1143t
 Scar, 102-103
 hypertrophic, 109
 Scar formation, 100, 100f
 repair by, 105b
 steps in, 103-104, 103f
 Scarlet fever, 365b
 Scattered microinfarction, 543
 Scavenger receptors, in inflammation, 78
 Schiller-Duval body, in yolk sac, 1031, 1031f
Schistosoma haematobium infection, 398b, 398f
 and bladder cancer, 965
 Schistosomiasis, 397-398, 398b, 863
 Schlemm canal, 1320f
 Schneiderian papilloma, 737, 737f
 Schwann cells, 1228
 Schwannomas, 1247, 1248f
 morphology of, 1247b
 Scirrhous tumors, 266
 Sclera, 1320f, 1324
 Scleroderma, 228-230, 687
 Sclerosing lymphocytic lobulitis, 1047
 Sclerosing osteomyelitis of Garré, 1195b
 Sclerosing retroperitoneal fibrosis, of ureters, 961
 SCN4A, mutations of, 1246
 Scrub typhus, 384, 385b
 Scurvy, 443
 bleeding disorders due to, 657
 Sebaceous adenomas, 1152, 1152b-1153b
 Sebaceous carcinoma, 1154
 of eyelid, 1322, 1322b, 1322f
