

- Skin disorders (*Continued*)
- of epidermal appendages, 1172-1174
 - acne vulgaris as, 1172-1173
 - rosacea as, 1173-1174
 - of epidermal maturation, 1161-1162
 - ichthyosis as, 1161-1162
 - familial cancer syndromes with cutaneous manifestations, 1156t
 - infection, 1175-1178
 - molluscum contagiosum as, 1175
 - verrucae (warts) as, 1175
 - inflammatory dermatoses as
 - acute, 1162-1164
 - eczematous dermatitis, 1163
 - erythema multiforme as, 1164
 - urticaria as, 1162
 - chronic, 1165-1166
 - lichen planus as, 1166
 - psoriasis as, 1165
 - seborrheic dermatitis as, 1166
 - panniculitis as, 1174-1175
 - erythema nodosum and erythema induratum as, 1174-1175, 1174b
 - of pigmentation and melanocytes, 1143-1150
 - dysplastic nevi as, 1145-1146
 - freckles (ephelis) as, 1143-1144
 - lentigo as, 1144
 - melanocytic (pigmented) nevus (mole) as, 1144-1145
 - melanoma as, 1147-1150
 - pre-malignant and malignant epidermal tumors as, 1154-1157
 - actinic keratosis as, 1154
 - basal cell carcinoma as, 1155-1157
 - squamous cell carcinoma, 1155
 - tumors of cellular migrants to, 1159-1160
 - mastocytosis as, 1160
 - mycosis fungoides as, 1159-1160
 - tumors of dermis as, 1158-1159
 - dermatofibrosarcoma protuberans as, 1158-1159
 - fibrous histiocytoma, 1158
- Skin lesions
- nomenclature of, 1143t
 - in sarcoidosis, 693b-694b
- Skin wounds, healing of, 106-109
- Skull fractures, 1259
 - displaced, 1259
- SLAM-associated protein (SAP), 242
- Slit hemorrhages, 1267-1268
- SMAD4 gene, due to pancreatic carcinoma, 893
- Smads, 20
- Small-airway disease, 674t
- Small-caliber minor papilla, 883
- Small cell carcinoma, 714, 717
 - of bladder, 967
 - of lung, 1123
- Small cell change, in liver, 871, 872f
- Small interfering RNAs (siRNAs), 5
- Small intestine. *See also* Intestine
 - ischemic bowel disease of, 779-780, 779b, 780f
 - obstruction of, 777-778, 778f
- Small lymphocytic lymphoma (SLL), 591t, 593-594, 593f, 594f, 598b
 - morphology of, 593b
- Smegma, 970
- SMO protein, in nevoid basal cell carcinomas, 1156
- Smog, 407-408
- Smokeless tobacco, 414-415
 - health effects of, 417b
- Smoking, 414-415. *See also* Cigarette smoking
 - and lung cancer, 415-416, 415t, 416f
 - and other diseases, 416-417, 417f
 - white cell neoplasia and, 587
- “Smoky coal”, 689-690
- Smoldering myeloma, 598, 601, 602b
- Smooth endoplasmic reticulum (SER), 6, 12
- Smooth muscle cells, vascular, in response to injury, 486
- Smooth muscle proliferation, in atherosclerosis, 496
- Smooth muscle proteins, 34
- Smooth muscle tumors, 1223
 - SNAIL*, in metastasis, 309
- Soap-bubble lesion, 388f
- Sodium retention, edema due to, 114
- Soft chancre, 370, 370b
- Soft tissue, 1219-1225
 - pathogenesis of, 1219-1220
 - tumors, 1220t, 1224b
 - in adipose tissue, 1220-1221
 - chromosomal abnormalities in, 1219t
 - fibrous, 1221-1222
 - in skeletal muscle, 1222
 - in smooth muscle, 1223
 - of uncertain origin, 1223-1224
- Soft tissue callus/procallus, 1193
- Solid-pseudopapillary neoplasm, of pancreas, 891
- Solitary myeloma, 598, 601, 602b
- Solitary nodules, in thyroid, 1093
- Solitary tumors, 1121b
- Somatic hypermutation, 587
- Somatic motor function, 1227
- Somatic sensory function, 1227
- Somatostatin, 1105
- Somatostatinomas, 1122
- Somatotroph, 1076t
- Somatotroph adenomas, 1079, 1079b
- Sommer sector, 1264
- Sonic hedgehog (SHH) gene, in basal cell carcinoma, 1156, 1157f
- Soot
 - as air pollutant, 409
 - occupational health risks, 413
- Southern blotting, 177, 177f
- SOX9, 1182
- Sparsely granulated lactotroph adenomas, 1078b
- Specialized teratomas, 1030
- Spectrin, in hereditary spherocytosis, 632, 632f
- Spermatocord, tumors of, 975
- Spermatocoele, 980
- Spermatocytic seminoma, 976-977, 977b
- Spherocytosis, hereditary, 632-634, 632f, 633f
- Sphingomyelin, 7-8
- Spider cells, in cardiac rhabdomyomas, 576
- Spider telangiectasias, 516
- Spina bifida, 1256
- Spinal cord infarction, 1267f
- Spinal cord injury, 1263
- Spinal dysraphism, 1256
- Spinal muscular atrophy (SMA), 1245-1246, 1246f, 1301
- Spindle and epithelioid cell nevus, 1144t
- Spinocerebellar ataxias (SCAs), 1298-1299
- Spinocerebellar degenerations, 1298-1300
- Spirochetes, 378-382
- Spirolactone bodies, 1126b
- Spitz nevus, 1144t
- Spleen, 623-625, 623f
 - amyloidosis of, 260b-261b
 - congenital abnormalities of, 625
 - in immune system, 193
 - in infectious mononucleosis, 361b-362b
 - morphology of, 624b
 - neoplasms in, 625
 - rupture of, 625
 - in sarcoidosis, 693b-694b
 - in sickle cell disease, 636-637, 637f
 - in systemic lupus erythematosus, 222b-225b
- Splenic infarcts, 625, 625f
 - morphology of, 625b
 - in sickle cell disease, 636-637, 637f
- Splenic rupture, 625
- Splenomegaly, 624-625
 - congestive, 624
 - disorders associated with, 624t
- Spongiform, in prion diseases, 1282b, 1283f
- Spongiosis, 1143t, 1163b-1164b
- Spontaneous idiopathic pneumothorax, 722
- Sporadic goiter, 1091
- Squamocolumnar junction, of cervix, 1001, 1001f
- Squamous cell carcinoma (SCC), 266, 269f, 713-714, 716f
 - of bladder, 967
 - of cervix, 1005b-1006b, 1005f
 - of esophagus, 759-760, 759f
 - in exposure to arsenic, 412
 - head and neck, 731-734, 733b-734b
 - of oral cavity, 731-734, 733b-734b, 733f
 - of penis, 971-972, 972b, 972f
 - of skin, 1155, 1155b, 1156f
 - of vagina, 1000
- Squamous cell hyperplasia, of vulva, 996, 996f
- Squamous epithelial cells, 1141
- Squamous intraepithelial lesions (SILs), 1003-1004, 1003b, 1005t
- Squamous metaplasia
 - of bladder, 963
 - due to vitamin A deficiency, 437
 - of lactiferous ducts, 1046, 1047f
- Squamous neoplastic lesions, of vulva, 997-999
- Squamous papilloma(s)
 - laryngeal, 739, 739f
 - of vulva, 996-997
- Stable tissues, 101
- Staging, of cancer, 332
- Staphylococcal infections, 362-364, 363f, 364f, 364b
- Staphylococcal scalded-skin syndrome, 364b
- Staphylococcus aureus*, in pyogenic osteomyelitis, 1195
- Staphyloma, 1324, 1341b
- Stasis
 - in inflammation, 74
 - and thrombosis, 123
- Statins, 1240
- Status asthmaticus, 679, 682b
- Status marmoratus, 1259
- Steatosis, 62, 62f
- Stellate cell activation, 825f
- Stem cells, 26-29
 - cancer, 281, 303-304
 - niches, 27, 28f
 - in tissue regeneration, 101
- Stereotyped response to vascular injury, 486-487, 487f
