

Zhong Q, Layman LC: Genetic considerations in the patient with Turner syndrome—45, X with or without mosaicism. *Fertil Steril Inc* 98:775, 2012. [An update on the genotype—phenotype correlation in Turner syndrome.]

#### **Diseases Caused by Trinucleotide Mutations**

Bhakar AL, Dolen G, Bear MF: The Pathophysiology of Fragile X (and What It Teaches Us about Synapses). *Annu Rev Neurosci* 35:417, 2012. [An excellent discussion of the pathogenesis of Fragile X syndrome.]

Martelli A, Napierala M, Puccio H: Understanding the genetic and molecular pathogenesis of Friedreich's ataxia through animal

and cellular models. *Dis Model Mech* 5:165, 2012. [Molecular pathogenesis of Trinucleotide repeat mutation caused by loss of function.]

Nelson DL, Orr HT, Warren ST: The Unstable Repeats—Three Evolving Faces of Neurological Disease. *Neuron* 5:825, 2013. [An excellent review of how trinucleotide mutations give rise to disease.]

#### **Diseases Caused by Genomic Imprinting**

Buiting K: Prader-Willi Syndrome and Angelman Syndrome. *Am J Med Genet Part C Semin* 154C:365, 2010. [A succinct account of the two most common heritable diseases associated with genomic imprinting.]
