

Humoral Immunity

- Craft JE: Follicular helper T cells in immunity and systemic autoimmunity. *Nat Rev Rheumatol* 8:337–47, 2012. [A discussion of the properties and generation of follicular helper T cells and their roles in antibody production and autoimmunity.]
- Crotty S: Follicular helper CD4 T cells (TFH). *Annu Rev Immunol* 29:621–63, 2011. [A comprehensive review of the development and functions of follicular helper T cells.]
- Goodnow CC, Vinuesa CG, Randall KL, et al: Control systems and decision making for antibody production. *Nat Immunol* 11:681–8, 2010. [An excellent discussion of the major control points in the process of antibody production.]
- Victora GD, Nussenzweig MC: Germinal centers. *Annu Rev Immunol* 30:429–57, 2012. [An excellent review of the properties and formation of germinal centers and their roles in antibody responses and autoimmune diseases.]

Immune Regulation

- Chaudhry A, Rudensky AY: Control of inflammation by integration of environmental cues by regulatory T cells. *J Clin Invest* 123:939–44, 2013. [A thoughtful discussion of how regulatory T cells control inflammatory responses and maintain homeostasis in the immune system.]
- Josefowicz SZ, Lu LF, Rudensky AY: Regulatory T cells: mechanisms of differentiation and function. *Annu Rev Immunol* 30:531–64, 2012. [A detailed examination of the generation and functions of regulatory T cells.]
- Ohkura N, Kitagawa Y, Sakaguchi S: Development and maintenance of regulatory T cells. *Immunity* 38:414–23, 2013. [An excellent review of the molecular mechanisms underlying the generation, maintenance, and stability of regulatory T cells.]
- Sakaguchi S, Miyara M, Costantino CM, et al: FOXP3+ regulatory T cells in the human immune system. *Nat Rev Immunol* 10:490, 2010. [An excellent discussion of the properties and role of regulatory T cells in humans.]

Immediate Hypersensitivity, Allergy

- Galli SJ: The development of allergic inflammation. *Nature* 454:445, 2008. [An excellent review of the mechanisms of inflammation in allergic diseases.]
- Galli SJ, Tsai M: IgE and mast cells in allergic disease. *Nat Med* 18:693–704, 2012. [An excellent review of the roles of IgE antibody and mast cells in chronic allergic diseases.]
- Gurish MF, Austen KF: Developmental origin and functional specialization of mast cell subsets. *Immunity* 37:25–33, 2012. [A modern discussion of mast cell populations in different tissues, and their development and functions.]
- Holgate ST: Innate and adaptive immune responses in asthma. *Nat Med* 2012;18:673–83. [A comprehensive discussion of the roles of TH2 cells, cytokines, and other cells of the immune system in the development and resolution of asthma.]
- Holloway JW, Yang IA, Holgate ST: Genetics of allergic disease. *J Allergy Clin Immunol* 125:S81–94, 2010. [An update on susceptibility genes for allergic disease and what they tell us about pathophysiology.]
- Kauffmann F, Demenais F: Gene-environment interactions in asthma and allergic diseases: challenges and perspectives. *J Allergy Clin Immunol* 130:1229–40, 2012. [A thoughtful discussion of the complex interactions between susceptibility genes and environmental influences that may underlie allergic diseases.]

Other Hypersensitivity Reactions

- Jancar S, Sanchez Crespo M: Immune complex-mediated tissue injury: a multistep paradigm. *Trends Immunol* 26:48, 2005. [A summary of the mechanisms of immune complex-mediated tissue injury.]
- Maddur MS, Miossec P, Kaveri SV, et al: Th17 cells: biology, pathogenesis of autoimmune and inflammatory diseases, and therapeutic strategies. *Am J Pathol* 181:8–18, 2012. [An excellent review of the development and lineage relationships of TH17 cells and their roles in autoimmune and other inflammatory diseases.]
- Sturfelt G, Truedsson L: Complement in the immunopathogenesis of rheumatic disease. *Nat Rev Rheumatol* 8:458–68, 2012. [A review of complement deficiencies and the role of the complement system in autoimmune diseases.]

Weaver CT, Elson CO, Fouser LA, et al: The Th17 pathway and inflammatory diseases of the intestines, lungs, and skin. *Annu Rev Pathol* 8:477–512, 2013. [A detailed discussion of the biology of TH17 cells and their involvement in inflammatory diseases.]

Immunological Tolerance

- Basten A, Silveira PA: B-cell tolerance: mechanisms and implications. *Curr Opin Immunol* 22:566–74, 2010. [A comprehensive review of the molecular mechanisms of central and peripheral tolerance in B cells, and how the choice between activation and tolerance is determined.]
- Kywewski B, Klein L: A central role for central tolerance. *Annu Rev Immunol* 24:571, 2006. [A discussion of the mechanisms of central tolerance, with a focus on T cells.]
- Mueller DL: Mechanisms maintaining peripheral tolerance. *Nat Immunol* 11:21, 2010. [A discussion of the mechanisms of peripheral tolerance, with an emphasis on T cells.]
- Odorizzi PM, Wherry EJ: Inhibitory receptors on lymphocytes: insights from infections. *J Immunol* 188:2957–65, 2012. [An excellent review of the inhibitory receptors used by T lymphocytes to control their activation, the roles of these receptors in influencing the outcomes of infections, and the potential of targeting these receptors for the immunotherapy of cancer and chronic infections.]
- Schwartz RH: Historical overview of immunological tolerance. *Cold Spring Harb Perspect Biol* 4:a006908, 2012. [A thoughtful summary of the mechanisms of tolerance, the experimental studies behind the elucidation of these mechanisms, and how they may be disrupted to give rise to autoimmunity.]

Mechanisms of Autoimmunity: General

- Cheng MH, Anderson MS: Monogenic autoimmunity. *Annu Rev Immunol* 30:393–427, 2012. [An excellent review of autoimmune syndromes caused by single-gene mutations, and what they teach us about pathways of immunological tolerance.]
- Goodnow CC: Multistep pathogenesis of autoimmune disease. *Cell* 130:25, 2007. [An excellent discussion of the checkpoints that prevent autoimmunity and why these might fail.]
- Mathis D, Benoist C: Microbiota and autoimmune disease: the hosted self. *Cell Host Microbe* 10:297–301, 2011. [A review of the evidence that the microbiome influences immune activation and autoimmunity, and the relevance of these findings to human autoimmune diseases.]
- Palmer MT, Weaver CT: Autoimmunity: increasing suspects in the CD4+ T cell lineage. *Nat Immunol* 11:36, 2010. [A thoughtful discussion of the central role of CD4+ T cells in the pathogenesis of autoimmune diseases.]
- Voight BF, Cotsapas C: Human genetics offers an emerging picture of common pathways and mechanisms in autoimmunity. *Curr Opin Immunol* 24:552–7, 2012. [A discussion of the genetic associations with autoimmune diseases and the implications for understanding pathways of autoimmunity.]
- Wehrens EJ, Prakken BJ, van Wijk F: T cells out of control—impaired immune regulation in the inflamed joint. *Nat Rev Rheumatol* 9:34–42, 2013. [A review of how abnormalities in immune regulation may contribute to inflammation and tissue injury in autoimmune diseases.]
- Zenewicz L, Abraham C, Flavell RA, et al: Unraveling the genetics of autoimmunity. *Cell* 140:791, 2010. [An update on susceptibility genes for autoimmune diseases, how these are identified, and their significance.]

Systemic Lupus Erythematosus

- Banchereau J, Pascual V: Type I interferon in systemic lupus erythematosus and other autoimmune diseases. *Immunity* 25:383, 2006. [A review of the recently discovered role of interferons in SLE and other autoimmune diseases, and the potential for targeting this family of cytokines for therapy.]
- Liu Z, Davidson A: Taming lupus—a new understanding of pathogenesis is leading to clinical advances. *Nat Med* 18:871–82, 2012. [An excellent review of recent advances in understanding the genetics of lupus and the roles of innate and adaptive immune responses in the disease, and how these advances are shaping the development of novel therapies.]
- Tsokos GC: Systemic lupus erythematosus. *New Engl J Med* 365:2110, 2011. [An excellent review of the clinical features and pathogenesis of lupus.]
